SEM-III PHYSICS HONS O ... -09-11 at 01:35 GMT-7

### DIFFERENTIAL FORM OF FIRST LAW OF THERMODYNAMICS

$$dU = dQ - dW = dQ - PdV$$

A state function (examples:  $U$ ,  $S$ ) or point function is a property whose value does not depend on the path taken to reach that specific value. In contrast, functions that depend on the path from two values are called path functions (examples:  $Q$ ,  $W$ ).

$$W = \int_1^2 dW = \int_{V_1}^{V_2} PdV$$
