Annual e-governance report (2020-2021)

Bejoy Narayan Mahavidyalaya maintains a highly dynamic, resourceful and user-friendly website (www.bnmv.ac.in) which contains all vital information pertaining to the institution and provides a vivid picture of all its affairs-both academic and administrative.

o The domain of the college website was registered under ERNET India (Indian Research & Education Network) as per the instruction of the Government of India.

o The office administration is entirely computerized. All payments are made online through e-billing. All financial transactions including fees collection are performed digitally. CAMS 3.0 software is upgraded to CAMS 4.0 version, used in account section and administrative purpose. All service related systems concerning the staff members are maintained digitally through HRMS module of West Bengal Integrated Financial Management System (WBiFMS).

o Attendance of staff members are recorded through online biometric system. They can apply for leave and check the leave status through E-Time Office portal.

o All the departments and the central library have Local Area Network (LAN) connection with adequate number of computers for pursuing academic activities. A high speed broadband connection is available for office work.

o Students related administrative activities and support systems including admission, registration, examination form fill up and processing are operated digitally. Marks received by the students in the Internal Examinations are uploaded through Burdwan University portal. Results of the students are also preserved digitally in the students' database system.

o Faculty related data are collected and preserved digitally by IQAC for use in National Ranking Framework (NIRF), in preparing AQAR and SSR, self appraisal report for Career advancement Scheme and enabling other reporting pertaining to higher education.

o A computer lab has been set up for the Department of Mathematics and the same has been furnished with equipment and software for Language Laboratory which provides necessary technological support to the students for academically upgrading themselves and developing necessary skill and competence in the respective subjects of their pursuit.

o Enterprise Resource Planning (ERP) software is introduced to enable efficient management of various academic and administrative operations. This system also provides opportunity to both the teaching and the supporting staff members to avail access to system and data from remote locations.

o The institution has five ICT (Information and Communication Technology)-enabled classrooms for students, which are fitted with smart boards and other necessary accessories to provide students an exposure to the digital resources and in the process enrich them academically.

o Closed circuit television system has been installed for the safety and security of all the stakeholders.

o Integrated Library Management Software (Koha) has been introduced in the central library for searching of books. Faculty members are allowed access to numerous e-books and e-journals through INFLIBNET NLIST.
